

NICEST2 InfoBoard

You will find below the 5 most important news and outcomes of the NICEST 2 project.

1

ESMValTool survey: 16 answers only from researchers. 12 do not use ESMValTool. 2 have already developed ESMValTool recipes and 6 researchers shared their codes.

ESMValTool
Earth System Model Evaluation Tool

2

Bi-weekly ESGF Operation meetings are back!

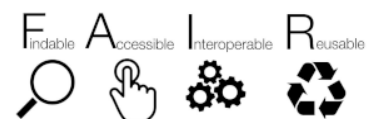

3

Upcoming online workshop with ESGF Operation Team and Nordic researchers to exchange on Climate data publishing. **The date is not set. Tell us if you want to attend!**

4

FAIR for Climate data and software: we are planning the next steps after a very successful M4M (metadata for Machine) workshop with EOSC-Nordic. Everyone is welcome to attend and contribute.

5

We would like to invite **HPC national providers and the climate research community** to discuss on our respective roles towards EuroHPC. This may even be submitted as a neIC pre-study: reach out if interested!
